

MEASURES OF ATTENDANCE, REACH, AND DOSAGE

Program-Level Measures

Number of youth who attended at least one program session:

- Number of middle school age participants
- Number of high school age or older participants

Number of youth who attended a program session, by program setting

Indicate the number of youth who attended a session in each of the following settings:

- In school, during school
- In school, after school
- In a community-based organization
- In a clinic
- In a foster care setting
- In a juvenile detention center
- In a residential mental health treatment facility
- Virtually¹
- In another setting

For program providers that operate the same program in more than one setting, grantees should report only the primary setting in which youth are served.

Number of youth who completed at least 75 percent of the scheduled program hours

Number of youths' parents and other caring adults who attended at least one program session

Populations represented by more than 50 percent of youth attending the program

Indicate which of the populations listed, if any, comprise more than 50 percent of program participants:

- In foster care
- Homeless or runaway
- Pregnant or parenting
- In adjudication systems
- LGBTQ youth

Grantees should only report that most youth in a program were from a specific population when they have information that confirms that assessment. If a grantee is uncertain, it should not indicate that population.

¹ Virtual includes any programming that is facilitated remotely rather than by an in-person facilitator, regardless of the physical setting where participants are located.

Cohort-Level Measure

A cohort, in this context, represents a group of youth that all jointly receive a defined SRAE program, which could include a specific curriculum and any additional hours of programming added to meet all requirements for the SRAE program. If a provider is delivering a SRAE program to multiple groups of youth simultaneously, but these groups meet separately, each group of youth should be considered a separate cohort. A cohort could consist of an individual, if programming is delivered one-on-one.

Cohort hours delivered

- *Number of hours of programming delivered overall to each cohort that ended during the period*

*The **number of program hours delivered** should consist of the hours for all defined SRAE programming, which could include a specific curriculum plus any additional hours of programming added to meet SRAE goals.*
